Company pension scheme

Refer a friend scheme

Annual holiday entitlement and statutory benefits

You must show willingness to work as a team member who has attention to detail, and can ensure the safety and wellbeing of the employer and can work flexibly according to the needs of the employer.

This role will involve a mixture of clinical and domestic duties including personal care. **Training and support in all aspects of this care will be provided by professional healthcare trainers.**

Whilst previous experience of working within a similar role is preferable, this is not essential as the priority is that you are a caring person with the ability to use your own initiative and learn how to support your employer with the health and social care tasks required.

If you feel that you have the appropriate qualities to undertake this fulfilling role and would like to be considered to join the team, **please contact Partner2Care on 0800 111 4167** for an informal discussion.

NB: DBS clearance (previously CRB checks) and two references will be required for the successful applicant.
